DETAILED ACTION

Election/Restrictions

Restriction to one of the following is required under 35 U.S.C. 121:

- I. Claims 1-4, drawn to a peptide for increasing bone density, said peptide being from 3-13 amino acids in length, classified in class 514, subclass 14.
- II. Claims 5-8, drawn to a peptide for increasing bone density, said peptide being from 12-18 amino acids in length, classified in class 514, subclass 13.
- III. Claims 9-21, drawn to a method for promoting bone deposition, classified in class 623, subclass 16.11.

The inventions are distinct, each from the other because of the following reasons:

The inventions of groups I and II are patentably distinct from each other because they drawn to different products having different structures. Group I is a peptide from 3-13 amino acids in length. Group II is a peptide from 12-18 amino acids in length. Consequently, the structures of each invention are different and patentably distinct.

The inventions of groups I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that

Application/Control Number: 10/045,673

Art Unit: 1654

product (MPEP 806.05(h)). In the instant case the peptide of group I does not require the method of use.

The inventions of groups II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP 806.05(h)). In the instant case the peptide of group II does not require the method of use.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roy Teller whose telephone number is (571)272-0971. The examiner can normally be reached on Monday-Friday from 5:30 am to 2:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brenda Brumback, can be reached on (571)272-0961The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

Art Unit: 1654

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
